

EVO™ MRS Grab

1 Capacity & Workload:
5m³ & 10Te

2 Operating Depth:
Full Ocean Depth

3 Supply Pressure:
3500psi

4 Weight & Dimensions:
(Open/Closed)

OD: 4000/2400mm
Height:
2500/3200mm
Weight: 4880kgs

marinTM

The EVO™ MRS Grab System can be used in the following applications:

- Boulders Recovery/Relocation
- Debris Recovery/Relocation
- Grout Bag Recovery/Relocation
- Concrete Mattress Recovery/Relocation

The EVO™ MRS Grab is a recovery system capable of full ocean depth operations. The EVO™ MRS has capacities of up to 40Te of grip force and a capacity to recover 10Te targets.

The EVO™ MRS Grab comes configured for surface operation or can be configured with hot stabs for ROV operation.

The tips can be fully customised to suit the specific target specified in the client work scope and are fully interchangeable.
